

Our country imported 4.8 billion barrels of oil in total energy-related products in 2007 valued at \$319 billion. Imagine if we would have been able to spend those dollars here at home what an injection that would be into this economy with the value of the dollar falling, so much related to imports, the economy tanking, the housing market in freefall and Americans feeling the true pinch of all of this. Our government here in Washington has not provided the leadership needed to end this plunge into national subservience.

The solution is clear: energy independence now. First, we have to look to our natural resources and pass a good farm bill to unleash the power of the earth and nature as a key part of the solution. And while there has been plenty of talk from our President about energy independence, the insistence on vetoing a bill, that does not live within artificial budget limits that he has declared, is an absurdity that threatens to destroy our progress. A good farm bill invests in rural America, providing an investment in infrastructure and research, including the energy technologies of tomorrow.

Second, we must continue to rely on the advanced research technology organized by the National Renewable Energy Lab and give this lab the resources to define and help redefine our new energy future. We need no less a commitment than we envisioned when we created NASA and space exploration. With that came security, and now we need energy security. It is that high a priority. This Congress, this President should be working to that end.

And third, we must pass legislation to fund the energy bill that passed the House last year, and then again this year, and call on our brethren in the other body to take action.

Unless we commit to providing leadership to transform our economy, this discussion remains the rhetoric of the last century really leaving us with a confused and unfulfilled daydream that has repeated itself for the last three decades.

As the American people face \$4 gasoline and see our wealth drained from us, we must take a new course. We are past the point of words. Real deeds are required. And we must stop our economic hemorrhaging and begin investing in our own Midwest, in our own country, not the Middle East, and pass on a free republic to our posterity worthy of the sacrifices of our founders and all those who gave their all in freedom's cause.

Liberty's call in this new century demands energy independence now.

SALUTING JORDAN LEEN, NATIONAL CHAMPION

The SPEAKER pro tempore (Mr. WELCH of Vermont). Under a previous order of the House, the gentleman from

Tennessee (Mr. WAMP) is recognized for 5 minutes.

Mr. WAMP. Mr. Speaker, I rise tonight because every now and then a person's story will so inspire us that the example is set for all young people to look up to, to follow in their footsteps. And that happened 9 days ago to a young man from East Tennessee whom so many people are so very proud of today.

His name is Jordan Leen. And 9 days ago, in the 157 pound weight class at Cornell University, Jordan Leen achieved his life's ambition of becoming a national champion. Among all universities from sea to shining sea, against some very difficult odds, this young man became a national champion.

He has moved up weight classes in his last couple of years at Cornell until he got comfortable and didn't have to lose weight to wrestle. So this is probably about his natural weight. He's what my son would call a "beast." I've seen him in all ways of his life.

He beat the number one seed, even though he was seeded eighth going into the tournament in the quarter finals, and he beat the number two seed in the finals just 3-2 in the most hard-fought match you've ever seen. And it was glorious. It was electric. He was distinguished through his high school career. And I want to focus on three things that made Jordan Leen a champion so others can look up to him and know that these are some of the ingredients for success.

One is family. His father, Mark; his mother, Tammy; his sisters, Andrea and Tara, they're a unit. The scriptural principle is that a cord of three strands is not easily broken; and with the Leens, a cord of five strands is not broken. They're a unit. They're a team. I know this because this young champion grew up across the street from me. He and my son, Weston, are best friends. This was a glorious moment not just in my family's life but in all of these Tennesseans' because this family was represented on the mat in front of the national ESPN audience a week ago Saturday, and we all took joy in this accomplishment from this fighter. He had been sick the week of the national championship, but he battled through that to become a national champion.

Ingredient number two, a foundation. He got it at the Baylor School with an outstanding wrestling program, an incredible tradition, and the foundation was there for him to become a collegiate athlete and a scholar athlete. He was the greatest wrestler in the history of the State of Tennessee by anyone's standard: a 4-year State champion; 215 victories; 9th, 10th, 11th, and 12th State champion all the way through high school at the Baylor School. He had the foundation for the program, and Baylor School is proud.

And, third, faithfulness. He was faithful through the years. He had a goal and he stuck with it. His work

ethic was greater than anyone's. He worked out harder. He fought harder. He suffered more through injuries. He was faithful all the way through. His father in the account said that that whole week of the championship he knew something was different because Jordan had turned the week over to the Lord. He was faithful. He gave it to God and said, I'm here to do my best. I'm sick, but I am here to do my best. And he was honored. And he was faithful.

He's an incredible young man. He's an inspiration to all. He's an excellent student, making a 3.3 at Cornell in premed, and a national collegiate champion in the 157 pound weight class.

Jordan Leen, East Tennessee salutes you. You're one of the greatest athletes in the history of our region. You have reached the climax, but you're still the same guy. And we love you for the example you have set for young people.

Young people, if you want to be a student athlete, follow Jordan Leen. Follow Jordan Leen.

Thank you, Jordan. Your family loves you, and we salute you on the floor of the House tonight.

STAFF SERGEANT MATTHEW MAUPIN

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Ohio (Mrs. SCHMIDT) is recognized for 5 minutes.

Mrs. SCHMIDT. Mr. Speaker, I rise tonight to offer my sincere condolences to the family of Staff Sergeant Keith Matthew Maupin. Yesterday, Keith and Carolyn Maupin learned that the United States Army had positively identified the remains found last week in Iraq as that of their son, Matt Maupin. After nearly 4 years of suffering the torment of not knowing the status of their missing son, I pray that this news may bring some closure to the Maupins and allow them to begin to mourn their loss and celebrate the life that Matt lived.

Keith Matthew Maupin was born in Batavia, Ohio, on July 13, 1983, and was a student at Glen Este High School in Union Township, Clermont County, Ohio, where he played football and was a rower on the county's high school crew team. Matt graduated in 2001 and enrolled in the University of Cincinnati's Aerospace Engineering Program. He joined the United States Army Reserve in 2002, attending basic training at Fort Jackson, South Carolina, and completed his advanced individual training at Fort Leonard Wood, Missouri, in the spring of 2003.

After completing his training, Matt continued his studies at the University of Cincinnati while fulfilling his obligations as an Army reservist. In November 2003, Matt received orders to transfer to the recently mobilized 724th Transportation Company based out of Bartonville, Illinois. Matt and the 724th arrived in Kuwait on February 20,
